

HELSINGBORG

Emil Lundgren Helsingborg has an office and workshop in **Helsingborg**, but work in the whole region. We mainly work with electrical and low voltage installations towards the industry, administration authorities and public business. For the projects we quote we offer turnkey solutions and we always coordinate our segments, so that the installations are executed in a cost effective way.

Activity

We work in northwest Skåne with total solutions for electrical, computer and low voltage installations. We have a long history behind us with a wide experience of major contracts and offer total solutions, from concept to operation. We have specialist expertise in high voltage transformers and switchgear, including design and programming.

We mainly work with the following things:

Electrical installations:

- ✓ Medium voltage plants 12-24 kv including switchgear, manoeuvre, control and signal as well as relay protection
- ✓ Power supply wiring to machines and other appliances
- ✓ Lighting fixtures and lighting control
- ✓ Control Installation of ventilation and heating systems
- ✓ Automation
- ✓ Programming PLC
- ✓ Machine installations
- ✓ Machine safety

Low voltage plants:
