

INSTRUMENTATION INSTALLATIONS

In cooperation with the brand Actemium we have a complete and sufficient organization to manage everything from single installation works to extensive construction projects such as a new industry or factory. Through continuous training, we make sure that we are always well up to date in technology, safety and standards in areas such as ATEX, PED, power and hot works. We have extensive experience in installations in hazardous areas and work on complex process plants during operation. Our special expertise is

- ✓ Installation of process instruments
- ✓ Pneumatics
- ✓ Small pipes
- ✓ Ladder mounting with cabling
- ✓ Field bus
- ✓ Main distribution works and
- ✓ Contacting of fibre cable
